

RDM 58/3

Automatic roll-fed thermoformer for forming/punching tools

The ILLIG RDM 58/3 automatic pressure forming machine for flat parts is highly productive with a large forming area and high product output. It employs combined forming and punching tools.

The RDM 58/3 automatic pressure forming machine for flat packaging parts with a forming area of 550 mm x 315 mm is designed for multi-row tools. Parts are formed without the use of a pre-stretcher. The formed parts are then transferred from the upper tool upwards to a counting and stacking station for streamlined stacking of snap lids, the center area of which is higher than the outer edge.

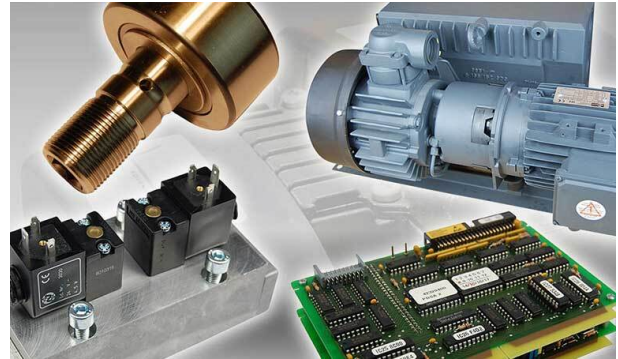

BENEFITS

TECHNICAL DATA

SERVICES

SPARE PARTS

With machine spare parts we offer our customers worldwide optimal support. Safe, reliable, superior parts for guaranteed quality.

SPARE PARTS

With tool spare parts we offer our customers worldwide optimal support. Safe, reliable, superior parts for guaranteed quality.

MONITORING

Our Monitoring products provide you a competitive advantage. Data analysis via our secure remote access service, enables you reduced costs and time for trouble shooting and increase the availability of your ILLIG system.

SERVICES

PROCESS IMPROVEMENT

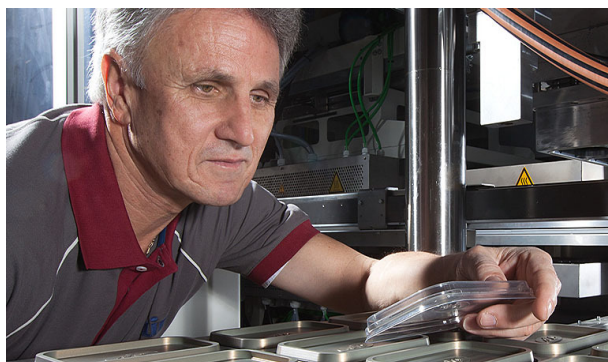

Our experts will help you with production or optimize the entire thermoform process to achieve more performance, better product quality and higher machine availability for your ILLIG system.

SERVICE AGREEMENTS

With service agreements we provide you support for your ILLIG system over the entire lifecycle.

TECHNICAL SERVICES

Technical Services offers our customers worldwide technical support.

SERVICES

TECHNICAL TRAINING

Master complexity - increase return. In accordance to this motto we educate the delegates to advanced line specialists.

ACCESSORIES

ILLIG accessories with ILLIG Quality. High-quality materials with a long lifespan, with targeted use, are a guarantee for optimal work results.
